Software engineering fresher with production CRM development experience and strong competitive-programming fundamentals (1171 Codeforces rating, 400+ problems solved across platforms). Seeking SDE / backend roles; open to data-adjacent positions.

EXPERIENCE

Graduate Trainee Engineer | Cubastion Consulting

Jul 2026 – Present

Promoted to full-time after conversion from Technical Intern (Jan 2026 – Jun 2026).

- Resolved 80+ production tickets and 10 change requests (CRs) as a Siebel CRM developer/consultant, maintaining an average resolution time of 5–6 hours.
- Fast-tracked to a live client project shortly after training, based on top-performing intern evaluation, ahead of conversion to full-time.
- Collaborated in an Agile SDLC using JIRA and ServiceNow across daily scrums, requirement analysis, testing, and deployment for enterprise CRM enhancements.

Trainee — Full-Stack Web Development | Grazitti Interactive

May 2024 – Jul 2024

- Completed a structured full-stack training program; built a Grocery Store Application using Python, Flask, MongoDB, and MySQL, implementing core business and database functionality.

PROJECTS

Placement Portal (Flask, Vue 3, Celery, Redis, JWT, SQLAlchemy) — [GitHub](#)

- Built a full-stack placement management system with separate student, company, and admin dashboards covering drive creation, eligibility-based applications, interview scheduling, and offer/placement tracking.
- Designed and integrated REST APIs for authentication, drive management, applications, and placement workflows.
- Implemented JWT-based authentication and a normalized 7-table relational schema (users, students, companies, drives, applications, interviews, placements).
- Used Celery + Redis for background jobs — automated deadline-reminder emails, monthly admin reports, and asynchronous CSV export of application history.

T20 World Cup Cricket Data Analytics (Python, Pandas, Bright Data, Power BI, GitLab) — [GitHub](#)

- Scraped and cleaned tournament data using Bright Data and Pandas in Jupyter Notebook, then built an interactive Power BI dashboard for team-performance insights.
- Managed the project using Kanban boards on GitLab for iteration tracking.

Portfolio Website (React.js, Vite) — [GitHub](#)

- Designed and deployed a responsive personal portfolio with React.js and Vite to showcase projects and skills, live at [my-portfolio-rajat-goyal.vercel.app](#).

COMPETITIVE PROGRAMMING

- Codeforces: 1171 rating, 165 problems solved (Python).
- LeetCode: 183 problems solved, including Top 50 SQL badge completion.
- 250–300+ additional problems solved across GeeksforGeeks, HackerRank, and Naukri Code360.
